GO INTERNATIONAL

dialnexa

Expand to countries you could never staff before.

Voice AI agents that speak your customer's language, call in their local hours, and run on our telephony or yours.

160+	70+	22+
countries	languages	Indian languages

WHAT THIS PART COVERS

dialnexa

Go International

01 **No language or timezone barrier** 03–05
Four barriers removed, with 70+ global and 22+ Indian languages on best-in-class AI.

02 **Calling the world** 06–07
160+ countries on our telephony. Dedicated US and India numbers, live in minutes.

03 **Bring your own carrier** 08
SIP trunking with your provider. No telephony charges.

04 **Test new markets** 09
Pilot one country, measure results, scale to the next.

THE PROBLEM, SOLVED

dialnexa

Going international used to mean hiring for it. Not anymore.

Voice AI removes the barriers that kept growth tied to headcount.

	THE OLD WAY		WITH DIALNEXA
LANGUAGE	✕ A native-speaking team per market	→	✓ **70+ languages** Native accents in every market
TIMEZONES	✕ Night shifts for your team	→	✓ **Local hours, 24/7** Calls inside each customer's day
REACH	✕ A local team in every country	→	✓ **160+ countries** Call wherever customers are
TELEPHONY	✕ Approvals and annual subscriptions	→	✓ **Live in minutes** Buy a number from the dashboard

BEST-IN-CLASS AI Transcribers, LLMs and voice synthesizers from OpenAI, Anthropic, Gemini, Deepgram and Soniox, for accurate calls in any global language.

EVERY LANGUAGE

dialnexa

Every customer hears their own language

70+ global and 22+ Indian languages, with native accents.

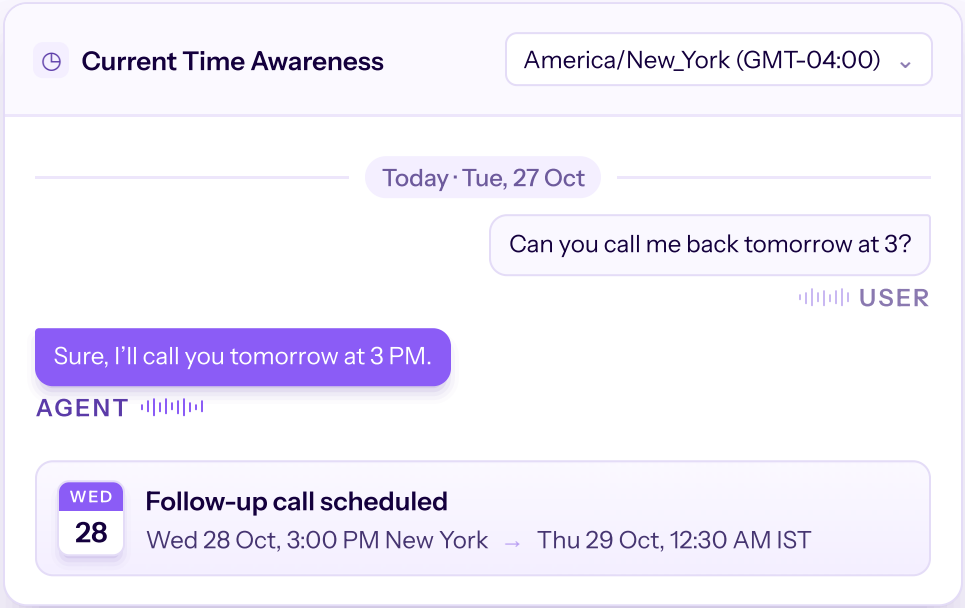

TIMEZONE-AWARE AGENTS

dialnexa

Configure agents to work in your customer's timezone

Agents schedule, call and follow up on the customer's clock, not yours.

- **Understands local time**
  When a customer says "call me tomorrow at 3 PM", the agent books 3 PM in their local timezone.
- **Dials only in their working day**
  Calls go out between 9 AM and 6 PM local time, so customers pick up.
- **No night shifts for your team**
  Agents reach New York at midnight IST while your team is offline.

WHAT WE DO

dialnexa

Your Voice AI agents, now calling the world

Use our telephony or your own. International calling is a setting, not a project.

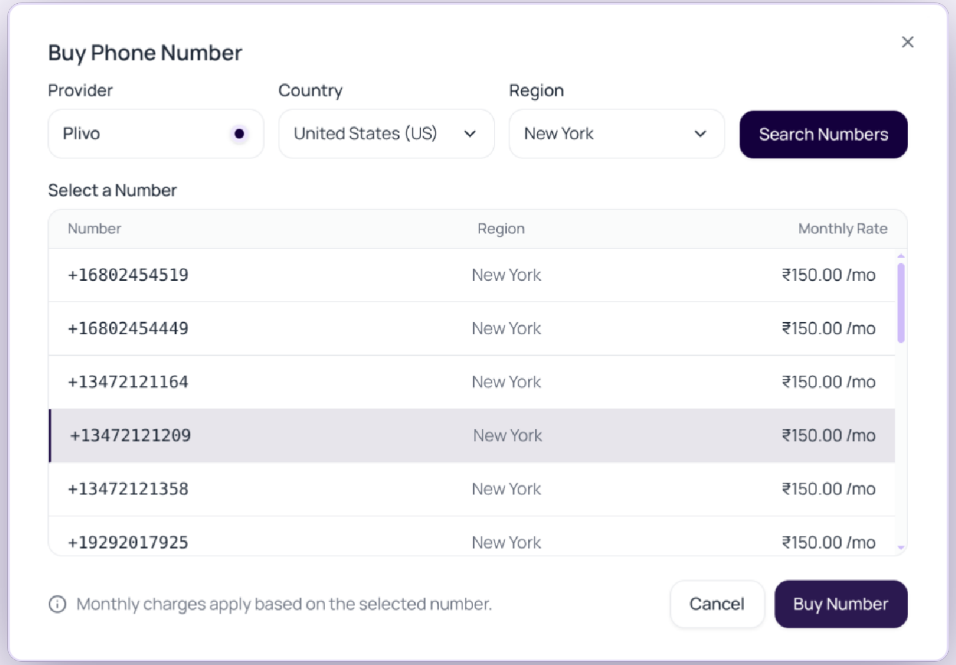

- **Our telephony** covers 160+ countries. One click, zero hassle go-live from the dashboard, with no approvals, tickets or sales calls.
- **Your local telephony** connects to DialNexa too, so customers see a local number. That means higher pickup rates, more trust and lower calling costs.
- **Nothing to rebuild.** Your agents, voices, flows, follow-ups and integrations work on international calls as they are.

GETTING SET UP

dialnexa

Buy a number. Start calling immediately.

Buy local numbers in the United States and India and dial out right away.

- **Dedicated number**
  The number is yours alone, used only by your agents.
- **Renews monthly**
  No annual commitment. Billed month to month.
- **Check before you buy**
  Search by region and pick the exact number you want.

BRING YOUR OWN CARRIER

dialnexa

Connect your telephony over SIP trunking

Plug your existing carrier into DialNexa and your Voice AI agents call through it, in any country it reaches.

01 Keep your carrier

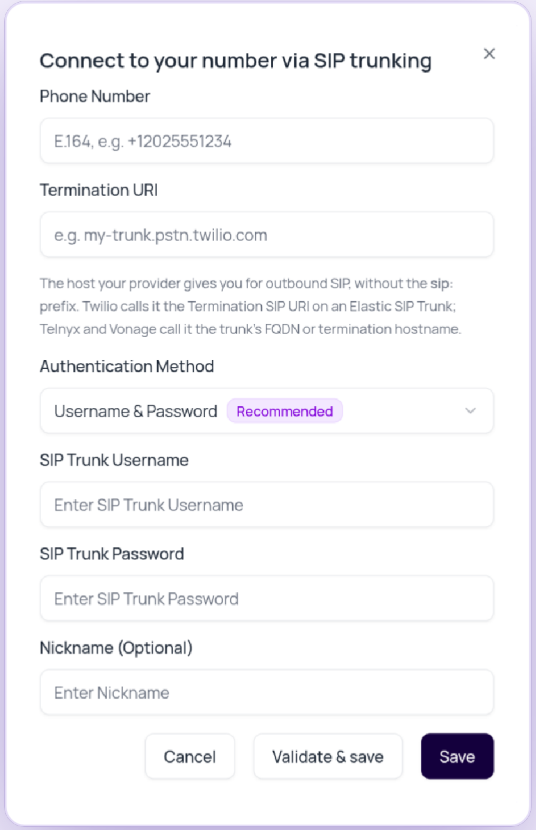

Use the provider and contracts you already have.

02 Keep your numbers

Call from the local numbers your customers already recognise.

03 Keep your rates

You only pay DialNexa a fixed cost for the AI stack and SIP trunking. No telephony charges.

NEW MARKETS

dialnexa

Tap into countries you never planned for

Testing a new market costs a campaign, not a team.

01 Pilot one country

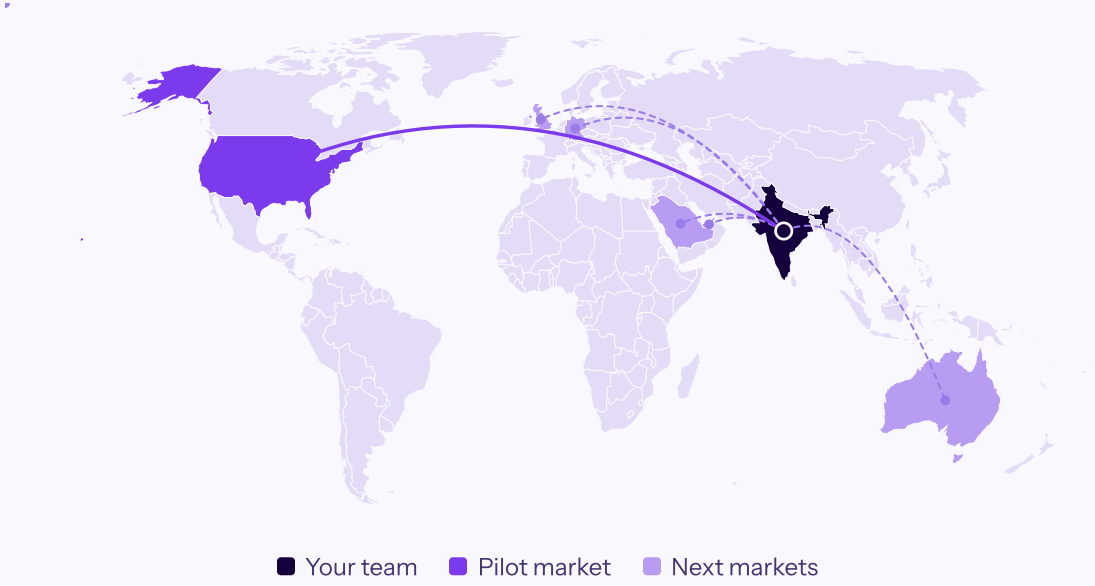

Launch a US campaign from India. No new hires.

02 Measure results

Compare connect rates, conversions and cost per lead against home.

03 Scale to the next

Add the UK, the UAE and Australia from the same dashboard.

dialnexa

Expansion without the overhead

Speak their language	70+ global and 22+ Indian languages
Know their local time	Timezone-aware agents
Go live in minutes	Dedicated numbers, or your carrier over SIP
Test new markets	Pilot, measure, scale

Previous
Automation of a Business Unit
Integrations and workflows that run a funnel unattended.

Next
Developer lens
API endpoints, webhooks and MCP endpoints for every action available on the dashboard.
